By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company, are inherently subject to significant business, economic and competitive uncertainties and contingencies. As such, no assurance can be given that such future results, including guidance provided by the Group, will be achieved; actual events or results may differ materially as a result of risks and uncertainties facing the Group. Such risks and uncertainties could cause actual results to vary materially from the future results indicated, expressed, or implied in such forward-looking statements. Forward-looking statements are not guarantees of future performance and the actual results of operations, financial condition and liquidity, and the development of the industry in which the Group operates, may differ materially from those made in or suggested by the forward-looking statements set out in this Presentation. Past performance of the Group cannot be relied on as a guide to future performance. Forward-looking statements speak only as at the date of this Presentation and the Company and its directors, officers, employees, agents, affiliates and advisers expressly disclaim any obligations or undertaking to release any update of, or revisions to, any forward-looking statements in this Presentation.

Restructuring and other related costs were \$12.6 million, pre-tax, in 2018 and related to three significant restructuring programmes:

- \$2.5 million in relation to the completion of the pre-IPO MIP programme, incurred pre-June 2018, giving total costs incurred in relation to this programme of \$25.6 million from 2015 to 2018;
- \$4.7 million in relation to the transition of head office support functions from the US to the UK. The programme is expected to complete in 2019 with a total cost of c. \$5.8 million; and
- \$5.4 million in relation to restructuring geographical sales teams. The programme is expected to complete in 2019 with a total cost of \$6.9 million.

The impairment/write-off charge of \$0.5 million relates to the final write-off of certain manufacturing fixed assets following the closure of the Greensboro site in 2017.

Other discrete tax items principally represent tax benefits of \$30.4 million and \$35.0 million respectively arising from the reassessment of deferred tax liabilities in relation to unremitted earnings and recognition of additional deferred tax assets resulting from the December 2017 US tax reform respectively. Refer to Note 4 of the Financial Statements for further information.
